Developer Tools: Git, GitHub

Experience

Seasia Infotech
Associate Consultant Software Engineer Jan 2023–Present

- Collaborated with the IT department to create incidents, manage issues, and gather requirements for the organization.
- Frontend development in Angular, integrating web API and UI using TypeScript.
- Backend development using ASP.NET in C for efficient data processing and management.

Projects

Frontend Developer

HelpDesk Project

- Developed a Helpdesk system to streamline incident management and requirements gathering for the IT department.
- Implemented a user-friendly UI using Angular and TypeScript.
- Integrated web API services for data exchange and retrieval.
- Collaborated with backend developers using ASP.NET (C) for data processing.

Software Engineer

Hospital Management System

- Designed and developed a comprehensive Hospital Management System.
- Utilized SQL for efficient data storage and retrieval.
- Implemented CRUD operations to manage employee data within a healthcare setting.
- Frontend development using Angular for a user-friendly interface.
- Used Azure Function for API management and scaling, Azure SQL for Database.

Software Engineer

Seasia Connect

- The primary objective of the project was to optimize organizational efficiency by providing robust tools for resource and project management.
- By integrating advanced technologies and implementing intuitive features, the project aimed to enhance productivity and streamline operations within Seasia Infotech.
- Backend: Leveraged the power of C# ASP.NET Core for robust and scalable backend architecture.
- Frontend: Employed ReactJS to craft dynamic and intuitive user interfaces, enhancing user experience and interaction.

Frontend Developer

MainStreet

- MainStreet is a real estate project designed to analyze the progress of buildings or apartments, aimed at facilitating sales management. It involves keeping records of tenants and their payments.
- Worked as a front-end developer on the assigned module, ensuring seamless integration between frontend and backend systems with Angular 15.
- Conducted debugging and testing of web pages to identify and resolve issues, ensuring smooth user experience.

Certifications

Microsoft

- *Microsoft Certified Azure Fundamentals,* 2023
- *C# Developer - LinkedIn Learning*
